SUMMARY

Full-Stack AI Engineer at Gamuda AI Academy, with a background as an Assistant Project Manager and Embedded Systems Engineer at Universum Venture Sdn Bhd. Experienced in leading development for an AI-powered SaaS platform, driving architectural vision and hands-on coding while successfully managing a cross-functional team in executing project deliverables. My key technical achievements include engineering a commercially deployed hardware-to-cloud IoT Locker System, managing B2B/B2C client relationships alongside supply chain logistics, and most recently, building a GenAI Tax Assistant to automate tax cycle workflows. Driven by a commitment to the evolving AI landscape, I am looking to leverage my full-stack and hardware experience to deliver long-term value and grow alongside a forward-thinking technology team.

SKILLS

- **AI Engineering & ML:** LLMs (Gemini), LangChain, RAG, Prompt Engineering
- **Languages & Frameworks:** Python, C++, SQL, JavaScript, React.js, Node.js, FastAPI, SQLAlchemy
- **Cloud & DevOps:** Firebase, GCP (Cloud Run, Cloud SQL), Git
- **Databases & Storage:** PostgreSQL, MongoDB
- **Hardware & Systems:** Raspberry Pi, Arduino, PLCs, PCB & Circuit Design, I/O Peripherals

EXPERIENCE

Full-Stack AI Engineer | Gamuda AI Academy | May 2026 - Present

- Engineered the core full-stack architecture utilising a high-performance Python FastAPI backend and a responsive React (Vite) frontend, maintaining strict execution control over data flows and API route handling.
- Architected an intelligent cloud infrastructure deployed on Google Cloud Platform (GCP), exploring and leveraging Google Gemini's multimodal capabilities across image, video and document analysis combined with advanced prompt engineering techniques.
- Led a multidisciplinary development team to build Cukai, an AI-powered SaaS platform purpose-built for Malaysian Sole Proprietors; incorporated advanced OCR for automated document classification and a custom RAG knowledge base to streamline expense consolidation and deliver real-time tax estimations.

Assistant Project Manager | Universum Venture Sdn. Bhd. | Jan 2024 - Dec 2025

- Managed B2B/B2C client relationships, supply chain logistics and technical vendor coordination across a portfolio of key corporate accounts.
- Optimised end-to-end digital transformation and platform optimisation of e-commerce operations across Shopify, Shopee and TikTok Shop.

Embedded System Engineer | Universum Venture Sdn. Bhd. | Sep 2019 - Dec 2023

- Engineered a commercial Smart Locker System using C++ and Python, successfully deployed at REXKL.
- Built secure hardware-to-cloud data pipelines connecting edge hardware diagnostics to PostgreSQL and AWS.
- Designed interactive touchscreen GUIs in Kivy for parcel and luggage operations.
- Managed the full product lifecycle, from initial circuit design and PCB layout through to site deployment and system testing at live commercial installations.

EDUCATION & CERTIFICATIONS

- Full-Stack AI Engineer Certification | Gamuda AI Academy | Expected July 2026
- Bachelor of Engineering (Electrical) / Bachelor of Medical Science | University of Technology Sydney | 2011 - 2018 | Specialisation: Signals and Control Systems
- Diploma of Engineering and Science | UTS College, Australia | 2010 - 2011
